APPROVED PATIENT INFORMATION LEAFLET JULY 2026

SCHEDULING STATUS: **S4**

LAMILEOD 10 mg/mL (oral solution)

Lamivudine

Contains sugar (200 mg of sucrose), Preservative (1,50 mg of methyl hydroxybenzoate), (0,18 mg of propyl hydroxybenzoate) and solvent (20 mg of propylene glycol).

Each ml of oral solution contains 200 mg of sucrose, 1,50 mg of Methyl hydroxybenzoate, 0,18 mg of Propyl hydroxybenzoate and 20 mg of Propylene Glycol

Read all of this leaflet carefully before you start taking LAMILEOD 10 mg/mL

- Keep this leaflet. You may need to read it again.
- If you have further questions, please ask your doctor, pharmacist, nurse or other health care provider.
- **LAMILEOD 10 mg/mL** has been prescribed for you personally and you should not share your medicine with other people. It may harm them, even if their symptoms are the same as yours.

What is in this leaflet

1. What **LAMILEOD 10 mg/mL** is and what it is used for
2. What you need to know before you take **LAMILEOD 10 mg/mL**
3. How to take **LAMILEOD 10 mg/mL**
4. Possible side effects
5. How to store **LAMILEOD 10 mg/mL**
6. Contents of the pack and other information

VR

<i>Applicant/PHCR:</i>	Macleods Pharmaceuticals SA (Pty) Ltd
<i>Product Name:</i>	Lamivudine 10 mg/mL oral solution
<i>Active Ingredient:</i>	Lamivudine
<i>Dosage Form:</i>	Oral solution
<i>Date:</i>	19 August 2026

1. What LAMILEOD 10 mg/mL is and what it is used for.

LAMILEOD 10 mg/mL contains lamivudine which belongs to a group of antiviral medicines, also known as antiretrovirals, called nucleoside analogue reverse transcriptase inhibitors (NRTIs).

These are used to treat human immunodeficiency virus (HIV) infection, which can lead to acquired immunodeficiency syndrome (AIDS).

LAMILEOD 10 mg/mL is used in antiretroviral combination therapy for the treatment of HIV infection in children and adults.

LAMILEOD 10 mg/mL does not cure AIDS or kill HIV but helps to prevent further damage to the immune system by slowing production of new viruses.

2. What you need to know before you take LAMILEOD 10 mg/mL

Do not take LAMILEOD 10 mg/mL:

- If you are allergic (hypersensitive) to lamivudine or any of the other ingredients of this medicine, (listed in section 6 below).

Warnings and precautions

Take special care with **LAMILEOD 10 mg/mL**:

if you have ever had liver disease, including hepatitis B or C

if you have ever had kidney disease

If you develop stomach pain, nausea or vomiting. Check with your doctor, as these could be signs of an inflamed pancreas.

It may result in a condition called lactic acidosis. If you are feeling unwell, consult your doctor.

If you have lipodystrophy (a problem with the way your body uses and stores fat). This condition is characterised by being overweight (obesity), build-up of fat on the back of the neck between the shoulders (buffalo hump), loss of fat under the skin (making the face look thin), breast enlargement and high levels of fat and glucose (sugar) in the blood. If you have any of these signs, you should be thoroughly examined by your doctor.

Applicant/PHCR:	Macleods Pharmaceuticals SA (Pty) Ltd
Product Name:	Lamivudine 10 mg/mL oral solution
Active Ingredient:	Lamivudine
Dosage Form:	Oral solution
Date:	19 August 2026

If you have advanced HIV infection, your immune system is weak, and you are more likely to develop serious infections (opportunistic infections). Such infections may have been “silent” and not detected by the weakened immune system before treatment was started. After starting treatment, the immune system becomes stronger, and may attack the infections, which can cause symptoms of infection or inflammation. Symptoms usually include fever, plus some of the following: headache, stomach ache or difficulty breathing.

In rare cases, as your immune system becomes stronger, it can also attack healthy body tissue (autoimmune disorders). The symptoms of autoimmune disorders may develop many months after you start taking medicine to treat your HIV infection.

If you notice any of these symptoms of osteonecrosis (where parts of the bone tissue die, because of reduced blood supply to the bone): joint aches and pain, joint stiffness or difficulty in movement, tell your doctor.

Other medicines and LAMILEOD 10 mg/mL

Always tell your healthcare professional if you are taking any other medicine. (This includes complementary or traditional medicines.)

Tell your doctor if you are taking any of the following medicines:

These medicines should not be used with **LAMILEOD 10 mg/mL**:

- Zalcitabine or emtricitabine, used to treat HIV infection.

Some medicines may affect how **LAMILEOD 10 mg/mL** works or make it more likely that you’ll have side effects. These medicines include:

- Trimethoprim-sulphamethoxazole (also known as co-trimoxazole), an antibiotic used to treat *Pneumocystis carinii* pneumonia or toxoplasmosis.
- Cladribine (used to treat a certain type of cancer).

Pregnancy, breastfeeding and fertility

If you are pregnant or breastfeeding your baby, please consult your doctor, pharmacist or other healthcare professional for advice before taking **LAMILEOD 10 mg/mL**.

Do not take **LAMILEOD 10 mg/mL** if you are pregnant, are considering becoming pregnant or are breastfeeding.

Driving and using machines

It is not always possible to predict to what extent **LAMILEOD 10 mg/mL** may interfere with the daily activities of a patient. Patients should ensure that they do not engage in the above activities until they are aware of the measure to which **LAMILEOD 10 mg/mL** affects them.

It is not always possible to predict to what extent **LAMILEOD 10 mg/mL** may interfere with the daily activities of a patient. Patients should ensure that they do not engage in the above activities until they are aware of the measure to which **LAMILEOD 10 mg/mL** affects them.

LAMILEOD 10 mg/mL contains sugar/sodium

If you have been told by your doctor that you have intolerance to some sugars, contact your doctor before taking this medicinal product.

LAMILEOD 10 mg/mL may have an effect on the control of your blood sugar if you have diabetes mellitus. Please note that each 150 mg dose (or 15 ml) contains 3 g of sucrose.

If your baby is less than 4 weeks old, talk to your doctor or pharmacist before giving them this medicine, in particular if the baby is given other medicines that contain propylene glycol or alcohol.

3. How to take LAMILEOD 10 mg/mL

Do not share medicines prescribed for you with any other person.

Always take **LAMILEOD 10 mg/mL** exactly as your doctor has instructed you. You should check with your doctor or pharmacist if you are not sure.

LAMILEOD 10 mg/mL is always taken with zidovudine.
